

Measures

- #130 Documentation of Current Medications in the Medical Record
- #226 Preventive Care and Screening: Tobacco Use: Screening and Cessation Intervention
- #354 Anastomotic Leak Intervention
- #355 Unplanned Reoperation within the 30 Day Postoperative Period
- #356 Unplanned Hospital Readmission within 30 Days of Principal Procedure
- #357 Surgical Site Infection (SSI)
- #358 Patient-Centered Surgical Risk Assessment and Communication

Reporting Instructions

(1) Identify patients with the following criteria:

- Aged 18 years and older on date of encounter
- Encounter during January 1 - December 31, 2016 with the following:

One of the following procedure codes indicating General Surgery:

19101, 19301, 19302, 19303, 19304, 19305, 19306, 19307, 36818, 36819, 36820, 36821, 36825, 36830, 43644, 43645, 43775, 43846, 43847, 44140, 44141, 44143, 44144, 44145, 44146, 44147, 44150, 44151, 44160, 44204, 44205, 44206, 44207, 44208, 44210, 44950, 44960, 44970, 47562, 47563, 47564, 47600, 47605, 47610, 49560, 49561, 49565, 49566, 49572, 49585, 49587, 49590, 49652, 49653, 49654, 49655, 49656, 49657, 60200, 60210, 60212, 60220, 60225, 60240, 60252, 60254, 60260, 60270, 60271

(2) Report all applicable measures within the measures group for at least 20 patients.

- The majority of the patients reported must be Medicare Part B Fee-for-service (FFS) patients, including Medicare Secondary and Railroad Medicare.
- For each measure, the measure's clinical performance must be satisfied for at least 1 patient. [Note: An asterisk (*) indicates that the measure's clinical performance is satisfied.]

For additional information or clinical rationale for measures, review the CMS Measure Specification for 2016 PQRS. All measures group Measure Specifications can be found on the NJII Member Portal > Registry > Getting Started section.

Patient Information

First Name	Middle Initial	Last Name	Date of Birth	
<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	
Visit Date	Medical Record Number	Gender	Male	Female
<input type="text"/>	<input type="text"/>	Medicare FFS Patient	Yes	No

Select Measures Performance

(page 1 of 3)

* Recommended clinical performance satisfied
^ Patient is excluded from measure's performance

Select one (1) clinical action for each measure below, where applicable:

#130: Documentation of Current Medications in the Medical Record

Eligible professional attests to documenting, updating or reviewing a patient's current medications using all immediate resources available on the date of encounter. This list must include ALL known prescriptions, over-the counters, herbals, and vitamin/mineral/dietary (nutritional) supplements AND must contain the medications' name, dosages, frequency and route of administration

- Current medications documented*
- Current medications not documented (Patient not eligible)^
- Current medications not documented (Reason not given)

#226: Preventive Care and Screening: Tobacco Use: Screening and Cessation Intervention

Patients who were screened for tobacco use at least once within 24 months AND who received tobacco cessation counseling intervention if identified as a tobacco user.

- Identified as tobacco user and cessation intervention performed*
- Screened for tobacco use and identified as non-user of tobacco*
- Not screened for tobacco use (Medical reason documented)^
- Identified as tobacco user and cessation intervention NOT performed
- Not screened for tobacco use (No reason documented)

Select Measures Performance

(page 2 of 3)

#354: Anastomotic Leak Intervention

Intervention (via return to operating room, interventional radiology, or interventional gastroenterology) for presence of leak of endoluminal contents (such as air, fluid, GI contents, or contrast material) through an anastomosis. The presence of an infection/abscess thought to be related to an anastomosis, even if the leak cannot be definitively identified as visualized during an operation, or by contrast extravasation would also be considered an anastomotic leak.

NOTE: A lower calculated performance rate for this measure indicates better clinical care or control.

Intervention for presence of leak of endoluminal contents through an anastomosis required

Intervention for presence of leak of endoluminal contents through an anastomosis not required*

Measure Not Applicable^

#355: Unplanned Reoperation within the 30 Day Postoperative Period

Unplanned return to the operating room for a surgical procedure, for any reason, within 30 days of the principal operative procedure.

NOTE: A lower calculated performance rate for this measure indicates better clinical care or control.

Unplanned return to the operating room for a surgical procedure, for any reason, within 30 days

No return to the operating room for a surgical procedure, for any reason, within 30 days*

#356: Unplanned Hospital Readmission within 30 Days of Principal Procedure

Inpatient readmission to the same hospital for any reason or an outside hospital (if known to the surgeon), within 30 days of the principal surgical procedure.

NOTE: A lower calculated performance rate for this measure indicates better clinical care or control.

Unplanned hospital readmission within 30 days

No unplanned hospital readmission within 30 days*

Select Measures Performance

(page 3 of 3)

#357: Surgical Site Infection (SSI)

Number of patients with a surgical site infection.

NOTE: A lower calculated performance rate for this measure indicates better clinical care or control.

Surgical site infection

No surgical site infection*

#358: Patient-Centered Surgical Risk Assessment and Communication

Documentation of empirical, personalized risk assessment based on the patient's risk factors with a validated risk calculator using multi-institutional clinical data, the specific risk calculator used, and communication of risk assessment from risk calculator with the patient and/or family.

Completed*
